PROFESSIONAL SUMMARY

Results-oriented Data Science & AI undergraduate (GPA: 3.84/4.0) with hands-on experience delivering business technology solutions for enterprise-wide digital transformation across consulting environments at IIT Roorkee and DRDO. Proficient in Python, SQL, RDBMS, algorithms & data structures; fluent in English with expertise in Agile, Waterfall, client engagement, technology advisory, technical design, and project implementation planning within cross-functional, client-facing teams.

EDUCATION

B.Sc. in Data Science and Artificial Intelligence
Christ (Deemed to be University), Delhi, India

2023 – 2026
GPA: 3.84 / 4.0 | Merit Scholarship, Academic Excellence (2023–24 & 2024–25)

TECHNICAL SKILLS

Languages & Databases: Python, SQL (RDBMS), R — query optimization, data modelling, algorithms & data structures
Frameworks & ML: Scikit-learn, PyTorch, Hugging Face, LangChain, Pandas, NumPy, Generative AI, Agentic AI
BI & Visualization: Power BI, Tableau, Excel, Matplotlib, Seaborn, Streamlit
Cloud & DevOps: AWS, Docker, Git, MLflow, Flask, WebSockets
Methodologies: Agile, Waterfall, SDLC, System Integrated Testing, Unit Testing, Embedded QA, Project Implementation Planning

INTERNSHIP EXPERIENCE

Research Intern

Jan 2026 – May 2026

Indian Institute of Technology Roorkee

Remote, India

- Designed and implemented a real-time secure file transfer business technology solution using AES-256-GCM encryption for OPGW cable transmission, benchmarking symmetric & asymmetric algorithms; architected sub-10 ms encrypted WebSocket broadcasting across distributed client environments, applying system-integrated testing and unit testing to validate cryptographic integrity end-to-end.
- Enabled automated file recovery with cryptographic audit logging to support enterprise transformation — improving client delivery traceability and contributing to data-driven decision-making across concurrent remote access environments.

Blockchain and AI Intern

May 2025 – Jul 2025

Defence Research and Development Organisation (DRDO)

On-site, India

- Delivered technology advisory and business process optimization insights across 3+ security pipelines for client engagement with leadership; conducted ROI analysis on smart contract deployment (Hardhat / OpenZeppelin), reducing access control overhead by 35% using Agile and Waterfall project implementation plans to align client delivery timelines.
- Partnered with 4 cross-functional client-facing teams across geographies to translate business requirements into scalable business technology solutions — defined KPIs, automated decentralized identity data pipelines, and drove enterprise-wide transformation goals across multi-geography client delivery engagements.

PROJECTS

dhruvprep — ML Data Preprocessing Library | [PyPI](#) / [GitHub](#)

2024

- Published Python business technology solution library on PyPI with 6+ modular utilities (data quality checks, feature scaling, encoding, multicollinearity detection) — streamlining analytical frameworks by 60–70% across 5K+ record datasets via RDBMS design, algorithmic efficiency, and scalable software design principles for enterprise client delivery.

Generative Language Model — Built from Scratch (15M Parameters) | [GitHub](#)

2024

- Designed and trained a 15M-parameter decoder-only Transformer in PyTorch (final loss: 1.24, 40% reduction over 10 epochs), applying technical design best practices, hybrid Agile–Waterfall project implementation planning, and embedded QA checkpoints to ensure on-schedule, high-quality client delivery of all model milestones.

CERTIFICATIONS

Full Stack Generative and Agentic AI (Python) — Udemy

Mar 2026

AWS Knowledge: Cloud Essentials — Amazon Web Services

May 2024

LEADERSHIP & ACHIEVEMENTS

Co-Leader, Corporate Club

2024 – 2025

Christ University, Delhi, India

- Led 11-member cross-functional team in a consulting-oriented environment, organizing 5+ corporate client engagement sessions impacting 200+ students through project implementation planning and industry-academia stakeholder management.
- Grand Finalist (Top 5 / 1,000+ teams) — Smart India Hackathon 2024, National Level | Finalist — AMD Developer Hackathon, San Francisco, USA.
- Top 10 Finalist — GenAI Hackathon 2025, GDG CGC Mohali | 3rd Place — Invictus'24, DTU.
